DETAILED ACTION

Claims 1-18 are pending in the application.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a method for inhibiting tumors using a DNA sequence, classified in class 514, subclass 44.
 - II. Claims 10-18, drawn to a DNA sequence, classified in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product (a DNA sequence) can be used in another materially different process. For instance, the DNA can be used for expressing a polypeptide in a bacterial cell for purification or to raise antibodies.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. For instance, the search for Group I would require a search of therapeutic compounds while the search for Group II would only require the search for the product.

Application/Control Number: 09/916,017

Art Unit: 1635

4. Claims 1-18 are generic to a plurality of disclosed patentably distinct species comprising the following RNA elements: mRNA with a hairpin confirmation having a stability of $\Delta G \geq 50$ Kcal/Mol, the 5' UTR of FGF-2, the 5' UTR of c-myc, the 5' UTR of cyclin-D1, the 5' UTR of VEGF, and the 5' UTR of Ornithine Carboxylase. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. A telephone call was made to Bonnie J. Davis on January 30, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
